

# Landscape Turf

Ideal for Residential & Light Commercial uses

## INSTALLATION GUIDELINES

- For proper drainage it is best to clear the area where you want your Landscape Turf, add 2-3" of aggregate to aid with the drainage process. Ensure slope is away from all buildings.
- Unroll your Landscape Turf & trim to the required size and shape of your area.
- If adjoining two rolls or more, ensure to use the seaming tape and adhesive as required.
- To secure the Landscape Turf in place use 8-10" nails around the perimeter to keep your Landscape Turf flat and in position.
- If using in a fenced pet area, additional fastening can be obtained by installing the turf under the fence in the pet area.
- Finally use a landscape rake or broom to comb and revive the lawn.
- Regular raking or brushing will help maintain your lawn for years!
- Depending on the number of pets you own, enzyme neutralizers can effectively limit and control odors. Neutralize with a homemade mixture of white distilled vinegar with an equal amount of water. After applying, wash thoroughly using a water hose.
