# Welcome to our 2022 Centura Education Product Guide.

Small details make a big difference when creating an environment conducive to learning and exploring. From the ground we walk on, the walls that frame our every step, and our surrounding's all-round look and feel.

Heavy-use walkways? Sphera Element (page 126) handles high foot traffic while complimenting your environment. Cost-efficient timely installation? Model'up (page 132) quickly installs without adhesive. Need a monolithic wall with minimal grout joints? Take a look at our porcelain slabs starting on page 70.

Centura has put together a comprehensive Product Guide to assist you in selecting products which will stand up to the abuse of Education facilities while achieving a high level of aesthetic.

Centura; a Canadian leader in wall and floor covering, is committed to a higher level of detail in all products and services – for a refined, professional setting that satisfies your needs. Feel free to contact your Centura Sales Representative for more detailed information on any of our products.

# contents

46

Accademia, thanks to its universal style, is perfect both for contemporary, minimalist settings and for renovation projects designed to remain in keeping with historical settings. In public and private environments, characterized by high foot traffic, full-body porcelain stoneware is the ideal choice, thanks to its particular uniformity between the surface and the internal structure. In spite of wear and tear and scratching, the appearance of the slab remains unaltered, maintaining the same texture.

128

Sphera Element is recognized to offer the most complete colour proposition in the market. With a wide range of subtle and soft neutrals and contrasting tones. Element is ideal for use in areas where the floor is required to blend with the environment. The carefully selected outspoken pastels and bright accent colours are ideal for areas requiring zoning or to create an authentic and welcoming interior.

76

Ariostea slabs, the answer is up to your creativity. The flexibility of ULTRA technology allows the product collections developed by Ariostea to be adapted to generate projects ranging from ordinary floors and walls with large and small surfaces.

158

New rubber flooring formulation that avoids color fading. ABPURE® is a revolutionary patented formulation with far superior colorfastness, meaning colors will not fade under light compared with traditional rubber formulas.

Show your pure color.

# Ceppostone

A colorbody porcelain collection that interprets the elegant Ceppo di Gré of Italy. Ceppostone reinvents the large, granular texture of Ceppo di Gré, a special stone valued for its beauty and strength since ancient times. The collection brings together the grey and mink of the ColorCode approach with modular sizes and offers a high degree of durability that makes it suitable for all usage conditions.

# Time 2.0

Time 2.0 is the concept of natural stone materialized in porcelain stoneware. The elegance and timelessness of stone gains expressions with the highest technical characteristics of full body porcelain stoneware by Margres. Available in natural, polished and anti-slip finishing and with an extremely high resistance. Time 2.0 offers a complete range of solutions for the demanding requirements of modern architecture, being the ideal solution both for wall and floor coverings in residential and public spaces.

# Glocal

Concrete was the favorite material of many architects and designers in the 20th century. Glocal fully exploits the characteristics of this material by offering a light and delicate series with crisp and deep textures of cement. Its neutral shades and its four sizes can easily be combined with each other to create attractive designs for home, office or retail outlets.

# Accademia

Accademia is inspired by the art of ancient Venetian floors, in the look and essence of authentic matter. With Accademia, craftsmanship tradition meets the high-tech focus and know-how of Ariostea, for a full-body porcelain stoneware collection with unrivaled performance. Carefully selected natural raw materials and pigmented powders, without the addition of toxic substances, are processed, mixed and pressed using high-tech production systems. The result is a full-body product, in which the whole ceramic support has the same composition: on the surface and throughout the tile, the material remains unchanged from a technical, aesthetic and functional point of view. Frostproof and resistant to chemical attack and the elements, it guarantees stability, durability and versatility. In public and private environments, characterized by high foot traffic, full-body porcelain stoneware is the ideal choice, thanks to its particular uniformity between the surface and the internal structure: in spite of wear and tear and scratching, the appearance of the slab remains unaltered, maintaining the same texture.

# Astra

From the endless combinations of natural materials comes Astra Full Body. Each slab is unique and authentically different from all the others: the dynamic harmony of the nuances shapes surfaces with an exclusive beauty. The natural surface in high-performance porcelain stoneware is non-absorbent and does not stain. The detail highlights the natural appearance of the material, derived from a mix of selected minerals.

# Lithos

A surface characterized by a fine roughness, with no highlights and with a more rustic style, perfect for emphatically and elegantly adding character to residential and commercial spaces, thanks to its slightly rugged aesthetic that recreates the allure of natural stone. This surface is also characterized by a different graphic that emphasizes its versatility and personality. Lithos has a new look, the result of exhaustive research and tireless experimentation. Cotto d'Este has creatively reinterpreted stone, combining its texture with the look of finest marble to produce this stylish collection of surfaces that just beg you to look, touch, and feel them.

\*Wall base available for special order, contact your local Centura Rep

# Venetian Marble

A collection inspired by the Venetian terrazzo flooring used since ancient times in Greece. It then reached and became widespread in Italy, thanks to the ancient Romans and then to the Venetian nobles.

Porcelain Slabs

# Coverlam

Coverlam is a range of innovative products made of natural raw materials, with mechanical properties and a visual appeal superior to those of any conventional covering materials.

Coverlam is the result of years of research and development. Thanks to the introduction of lamination pressing technology, it is now possible to produce 1200x3600 mm, 1620x3240 mm, 1000x3000 mm, 1200x2600 mm in a thinner thickness as low as 3.5 mm maintaining excellent mechanical and aesthetic properties.

Due to their slimline 3.5 and 5.6mm thickness, Coverlam tiles only weigh 7.8 kg/m<sup>2</sup> and 14 kg/m<sup>2</sup> respectively, making them much easier to cut and handle. This ensures substantial financial savings in design and building projects due to the faster execution times.

# Ariostea

There are technological moments in which a product makes the leap to being state of the art and changes our lifestyle. The scale of proportions is now far larger than the anthropometric reference points of the Modulor originally theorized by Le Corbusier in 1948. These reach 3 metres in height and relate not only to just the human factor, but to the building in its entirety allowing the resolution of the external interface as well as the dressing of the internal spaces. Ultra is the technological synthesis of an idea coming from our most glorious past: handling and controlling material to give shape to our objects and desires.

# Norr

The Norr collection is inspired by the iconic texture of the Italian stone Ceppo di Gré, with its harmoniously irregular pattern and shades of gray. It is enriched by a new proposal with a denser grain and a micro effect for a distinctive style. A source of inspiration to personalize every environment with a sophisticated look. It offers endless application possibilities: floors, wall coverings and interior design solutions, both in commercial and residential areas, for an aesthetic and functional project.

Resilient Flooring

# Sphera Element

Sphera Element is recognized to offer the most complete colour proposition in the market. With a wide range of subtle and soft neutrals and contrasting tones. Element is ideal for use in areas where the floor is required to blend with the environment. The carefully selected outspoken pastels and bright accent colours are ideal for areas requiring zoning or to create an authentic and welcoming interior.

The addition of a new visual “Element contrast” is a commercial addition to the collection offer. The difference is created by the bigger steps between the colour components which create a more outspoken version of the regular Element. This provides a more dirt- and scratch-resistant visual, which also can be used as an option for heavy traffic areas.

## Design & Colour

- A complete offer of colours for all requirements, including many colours with high LRV values, supporting the user experience in sufficiently light indoors
- New designs with excellent dirt hiding and scratch resistant properties
- Colour coordinated with Forbo's Under Control portfolio for controlled environments and other functional Forbo ranges

## Performance & Durability

- SMART-top finish specifically designed for easy cleaning & maintenance with high quality scratch resistant properties
- Resistant to commonly used disinfectants for personal care & health cure environments, prohibiting bacteria growth
- Approved for use in cleanrooms up to ISO class 4 by the Fraunhofer Institute

## Technology & Sustainability

- Low emissions & phthalate free manufacturing contribute to a healthy indoor environment
- Carefully selected raw materials to offer possibilities for re-use after end of life
- Low energy and water use thanks to the efficient state-of-art production process

# Sarlon Surestep

Surestep safety vinyl combines outstanding slip resistant properties with differentiated design. Through the use of unique slip resistant particles - Step Crystals, each colourway offers a clean, fresh look and lifetime slip resistant performance. The PUR Pearl surface provides superior, long-lasting appearance and performance. Surestep offers various exciting designs, like Steel, Wood and a unique digital printed floor design.

### SAFETY

- Guaranteed lifetime slip resistant performance, created with slip resistant particles throughout the wear layer.
- Step covers all relevant slip resistance ratings (R11, R11, R12) to meet safety demands across a wide range of applications.

### DESIGN

- All Step ranges are designed with the application in mind, including fresh & stylish floor designs for continuously wet and barefoot/footwear combined areas.

### CONFIDENCE

- All Step safety floors are protected with PUR (Wood) Pearl™, a finish that is stain, scratch and chemical resistant and offers superior appearance retention.
- Thanks to this PUR Pearl™ finish, Step floors offer unmatched cleaning & maintenance performance.
- Innovative slip resistant particles made from recycled material - Step Crystals - contribute to a clean fresh design and easier cleaning.
- Step is 100% phthalate free and has at least 70% recycled content in the backing.
- Forbo has over 50 years of experience in designing and manufacturing safety vinyl floor coverings.

# Modul'up

Modul'up is the best loose lay floor covering available for high traffic applications. It can be installed quickly without adhesives, but is even more time and cost efficient at time of replacement. The range is suitable for sustainable solutions due to the re-usability of the product. Modul'up can be walked on immediately after installation. As minimal subfloor preparation is required, over 20% of costs can be saved when using Modul'up compared to a standard, glue down flooring.

## Glue Down Commercial Grade Construction

# Ultra Ceramic

This next generation of engineered stone created for commercial environments provides the look and elegance of grouted ceramic tile, natural stone, or porcelain without the inconvenience. Ultra Ceramic installs faster than natural stone tiles and is easier to clean and disinfect.

**Faster Occupancy** – Ultra Ceramic is lighter, easier to cut, can be installed and grouted within a day, on average 3 times faster than ceramic tiles or marble.

**Durable** – Commercial traffic application with a 20-mil wear layer, resistant to commercial traffic, stain-resistant, and quieter than natural stones.

**Low Maintenance** – Ultra Ceramic is not inclined to lose its gloss when cleaned and disinfected compared to marble and other natural stones.

**Stylish** – Its patent-pending rounded edge design and construction provide the authentic look and feel of ceramic and stone without compromise to quality and style.

- Phthalate-free.
- FloorScore certified.

# Sonata Elements

Sonata Elements provides the hygienic benefits of luxury vinyl tiles complemented with a dimensional striated textile visual inspired by modular carpet tiles. This versatile flooring line features 5 neutral base colors and 10 color coordinated tone-on-tone and chromatic gradient accent tiles. The 15 tiles can be used monolithically or mixed allowing for functional wayfinding areas and unlimited flooring patterns.

Sonata Elements features a no-wax-for-life aluminum oxide polyurethane surface treatment, making it easy to clean and disinfect.

## FEATURES & BENEFITS

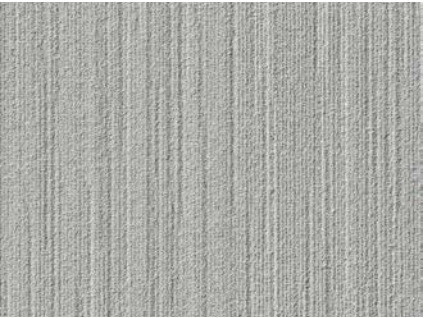

- Sonata Elements is a 2.5 mm LVT with a 20-mil wear layer for commercial applications available in an 18" x 36" tile format.
- Meets ASTM F 1700 Class III, Type B.
- It features an aluminum oxide polyurethane surface treatment that provides superior scratch and stain resistance and a no-wax-for-life flooring that can be easily cleaned and disinfected limiting the spread of infections.
- Non-bevelled, straight edge
- Matte effect finish with light emboss
- Phthalate-free
- Industry wide EPD
- FloorScore® certified.

# Tuflex Spartus

Tuflex Spartus tiles are manufactured using a simultaneous vulcanization process and a new, industry-leading Red List chemical free formulation that is **FREE** of tire-derived crumb rubber.

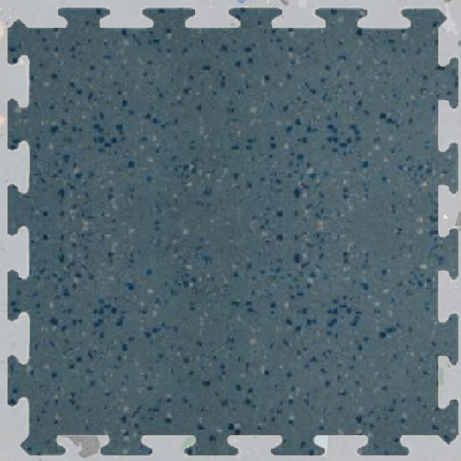

Tuflex® Spartus Multipurpose Sports Flooring is a rubber flooring product designed for interior sports and commercial applications. Because of its durability and resilience, Tuflex Spartus is used in many professional sports facilities. The manufacturing process for Tuflex Spartus consists of a unique, permanent vulcanization system that ensures the face coat and base layer will not separate, and we guarantee it for the life of the flooring. Tuflex Spartus' smooth surface makes it easier to clean and maintain than many other recycled rubber flooring products. Tuflex Spartus has an appealing visual appearance as well as sound and shock absorption and softness under foot. The Tuflex Spartus Multipurpose Sports Flooring Tile formulation is screened according to current authoritative lists and does not contain any chemicals contained in the Living Future Institute's Red List (Living Building Challenge, Imperative 10), substances of very high concern (SVHC) on the REACH candidate list, or substances restricted under REACH.

# Maxime Plus

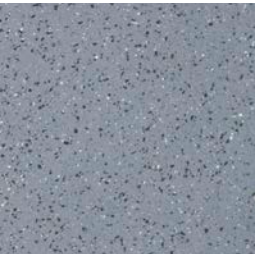

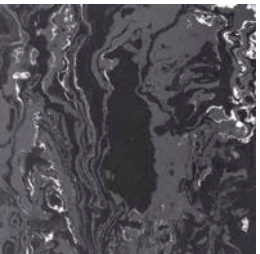

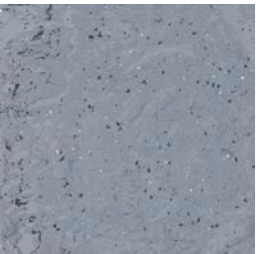

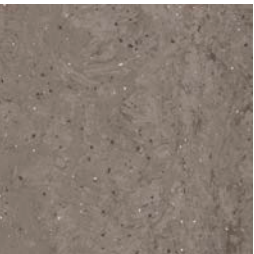

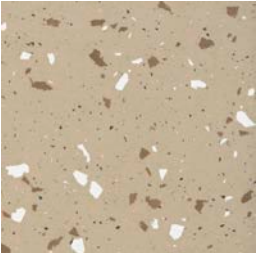

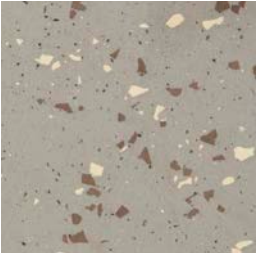

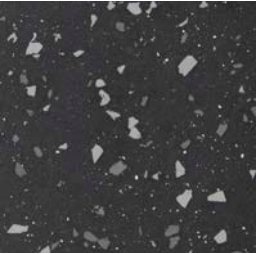

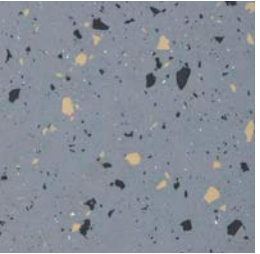

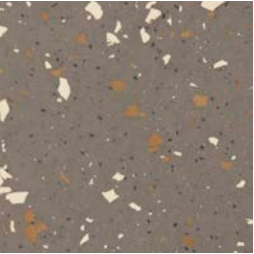

Maxime Plus Rubber Flooring is the result of an industry-leading process that eliminated delamination, featuring a formulation that is free of Red List chemicals and no tire-derived crumb rubber. The improved manufacturing process also eliminates the need to seal the floor. Reducing the time and costs associated with maintenance. The Lifetime Delamination Warranty plus a lower life-cycle cost over the extended life of the flooring delivers guaranteed performance for the most demanding environments.

**Multi-purpose:** Education multi-purpose areas, latchkey/daycare areas, animal care areas including veterinarian offices, doggy daycare or grooming, retail display areas.

**Sports:** Weight rooms, training rooms, locker rooms, workout areas including free weight areas or under workout equipment.

**Healthcare:** Rehabilitation or therapy areas, or long-term care areas that receive heavy foot traffic.

# Texas Granite

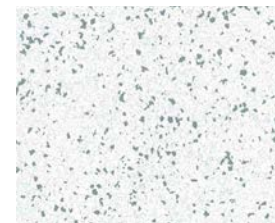

A floor that never needs wax or finish. The tiles come in a naturally brilliant shine imbued in the material. Thanks to the “Gloss Options” feature, Texas Granite can be buffed to achieve different shine levels during regular maintenance. From a brilliant shine to a matte look, Texas Granite provides a variety of gloss options. Texas Granite is comfortable underfoot, easily repairable, and lasts for decades due to its homogenous nature. Furthermore, the tiles are self-extinguishing and Micro-Ground™, making the floor virtually seamless and more hygienic than regular tiles whose seams attract dirt.

# Envire<sup>®</sup> Rubber Sheet and Tile

Envire<sup>®</sup> Rubber Sheet and Tile combines the sleek beauty of sheet flooring with a palette created to bring design versatility into your space creating an environment that is unique and timeless. Performs well where small-wheeled traffic may be present. Envire<sup>®</sup> Rubber Sheet and Tile was developed for use in high traffic areas that require natural resilience, exceptional wear resistance and dimensional stability. Ideal for use in operating rooms, labs, pharmacies, classrooms, corridors, multi-purpose areas, municipal and government buildings, clean rooms, showrooms, shopping malls, theaters, convention centers, air/bus/train terminals, elevators, lobbies and stair landings.

# Versa Quartz

Versa Quartz offers one of the best commercial flooring options where durability and wear resistance is needed. Versa Quartz is manufactured using a unique process utilizing quartz to produce one of the most durable commercial floor tiles that can meet almost any standard or specification.

# Electrotile

Electrotile Conductive (CVT) and Static Dissipative (SDT) tiles play an essential role in safeguarding critical electronic equipment. Electrotile is backed by proven performance over decades of use in heavy commercial environments. The line is perfect for all healthcare, institutional and commercial environments where sensitive electronic equipment is in use.

With more and more sensitive medical and electronic machinery in need of protection from static charge, the call for Electrotile flooring products has never been greater. Engineered specifically to meet the strict electrical resistance performance requirements that healthcare and high tech applications demand, Electrotile is the ESD flooring solution companies turn to time and time again. For decades now, American Biltrite has provided industry with millions of square feet of flooring to address ESD concerns worldwide.

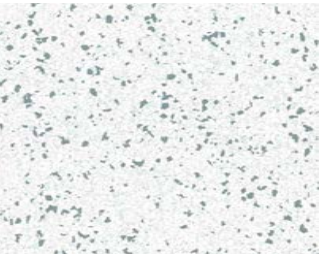

American Biltrite was the first to bring electrostatic flooring and carbon filament matrix technology to the market in 1965. As pioneers in the field of electrostatic flooring, American Biltrite’s goal isn’t simply to sell flooring that meets your ESD requirements. Our goal is to become an integrated part of your ESD protocol team and assist in the development of your ESD program. From specifying the flooring itself to the subfloor to the adhesive to ongoing ESD evaluations, we’re there. Once the floor is evaluated a warranty is issued based on all these factors. No one else does it, WE DO.

Protecting your business from ESD damage is critical. From electronics and clean rooms, to healthcare, pharmaceutical and telecommunications environments, Electrotile gives wafer or fiber optics manufacturers, hospitals, radiological facilities, or even munitions facilities, the reliability and durability they demand without forsaking aesthetics. All the while meeting strict electrical resistance performance requirements. Engineered to be durable and easy to maintain, Electrotile provides a specific electrical resistance range to protect your business.

With its dynamic pattern and range of colors, Electrotile is as beautiful as it is functional. Available in three sizes, Electrotile’s flexibility makes it an indispensable design tool regardless of the application.

# Northern Timbers

Roppe's Northern Timbers harmonize nature's best flooring options with today's technology to create beautiful floors that are environmentally friendly and fully recyclable. Northern Timbers offer timeless grains and hues that complement many design styles and textures.

- Premium construction that can be recycled after use and offers a 20-year commercial warranty. Glue down planks are formulated with non-phthalate plasticizers using 100% virgin materials, with over 50% of the raw materials sourced within a 100-mile radius.
- Made in the U.S.A. and meets GREENGUARD GOLD and CHPS criteria.
- 28 mil (.711mm) wear layer that exceeds ASTM F-1700 spec for commercial use. C-Shield UV cured ceramic bead finish adds durability while resisting scuffing and traffic patterns on the surface while promoting ease of maintenance.
- Nominal 1/8" construction glue down planks help conceal subfloor imperfections and allow for flush installation with other 1/8" products.
- Available in 23 colors/grains of 4" x 36" and 6" x 48" glue down planks with a straight edge.
- All colors/grains available at a Single Price Point.

# Contours Base

Now with three new profiles, including winners from our My Contours DESIGN Competition, Contours Profiled Wall Base System® offers the look of wood base with the enhanced properties of resilient base. Contours resists chipping, absorbing moisture and splintering while eliminating the costly tasks of nailing, filling and finishing traditional wood trim.

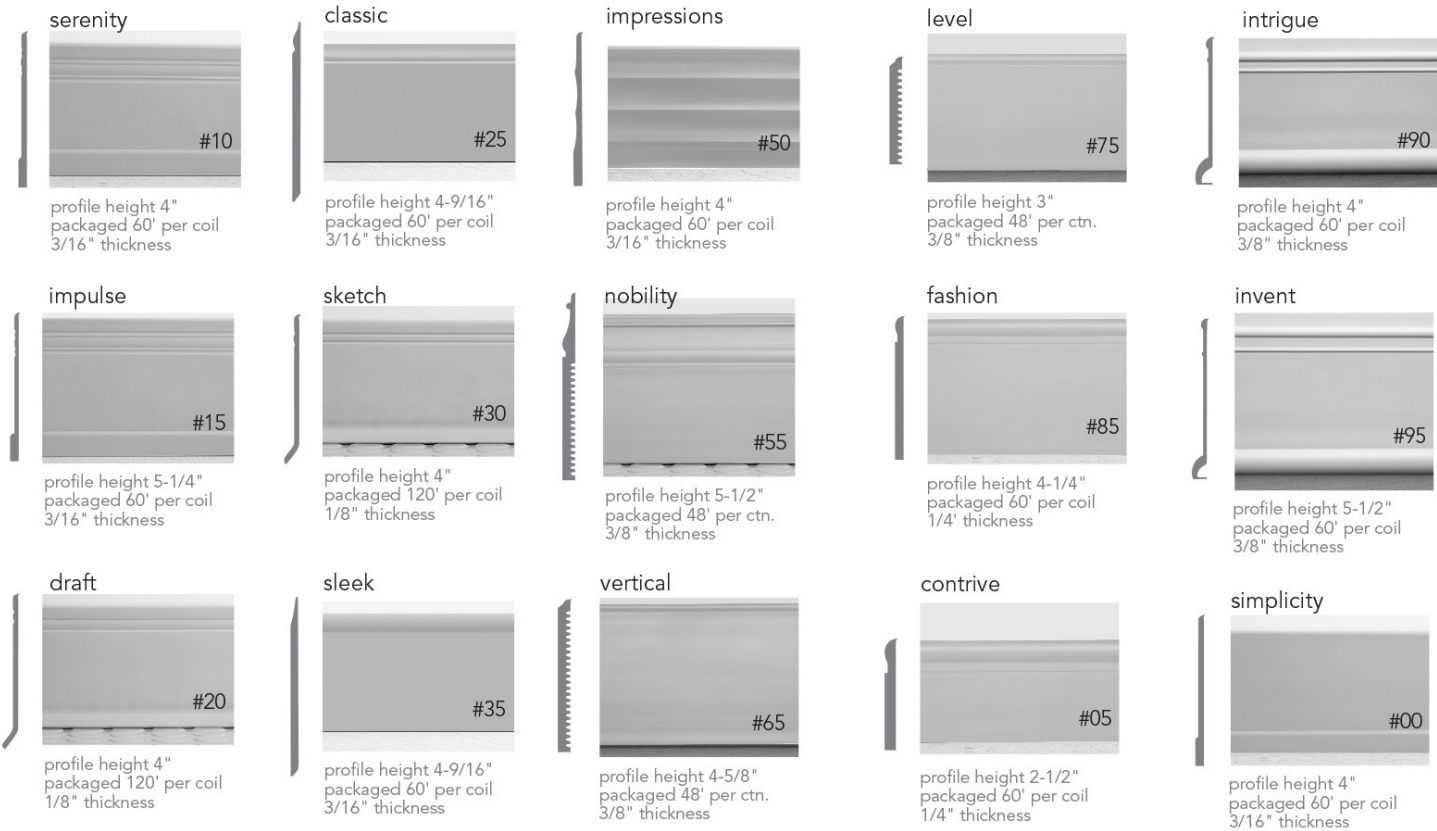

- Durable TPR rubber compound contains bio-based phthalate free plasticizer, from a rapidly renewable resource.
- Made in the U.S.A. and meets FloorScore®, NSF332 Platinum and CHPS criteria.
- Produced in 40' cartons. Available in 17 profiles with heights ranging from 3" to 7-3/4", a quarter round and corner options.
- Satin finish provides the look of custom-crafted woodwork, eliminating the nailing, sanding and priming associated with wood.
- Natural flexibility conceals irregularities in floors, walls and corners (e.g., seam of floor and wall, bowing walls, etc.), and allows for installing around architectural curves.
- All colors available at a Single Price Point. Other Roppe colors and custom colors available, minimums apply.

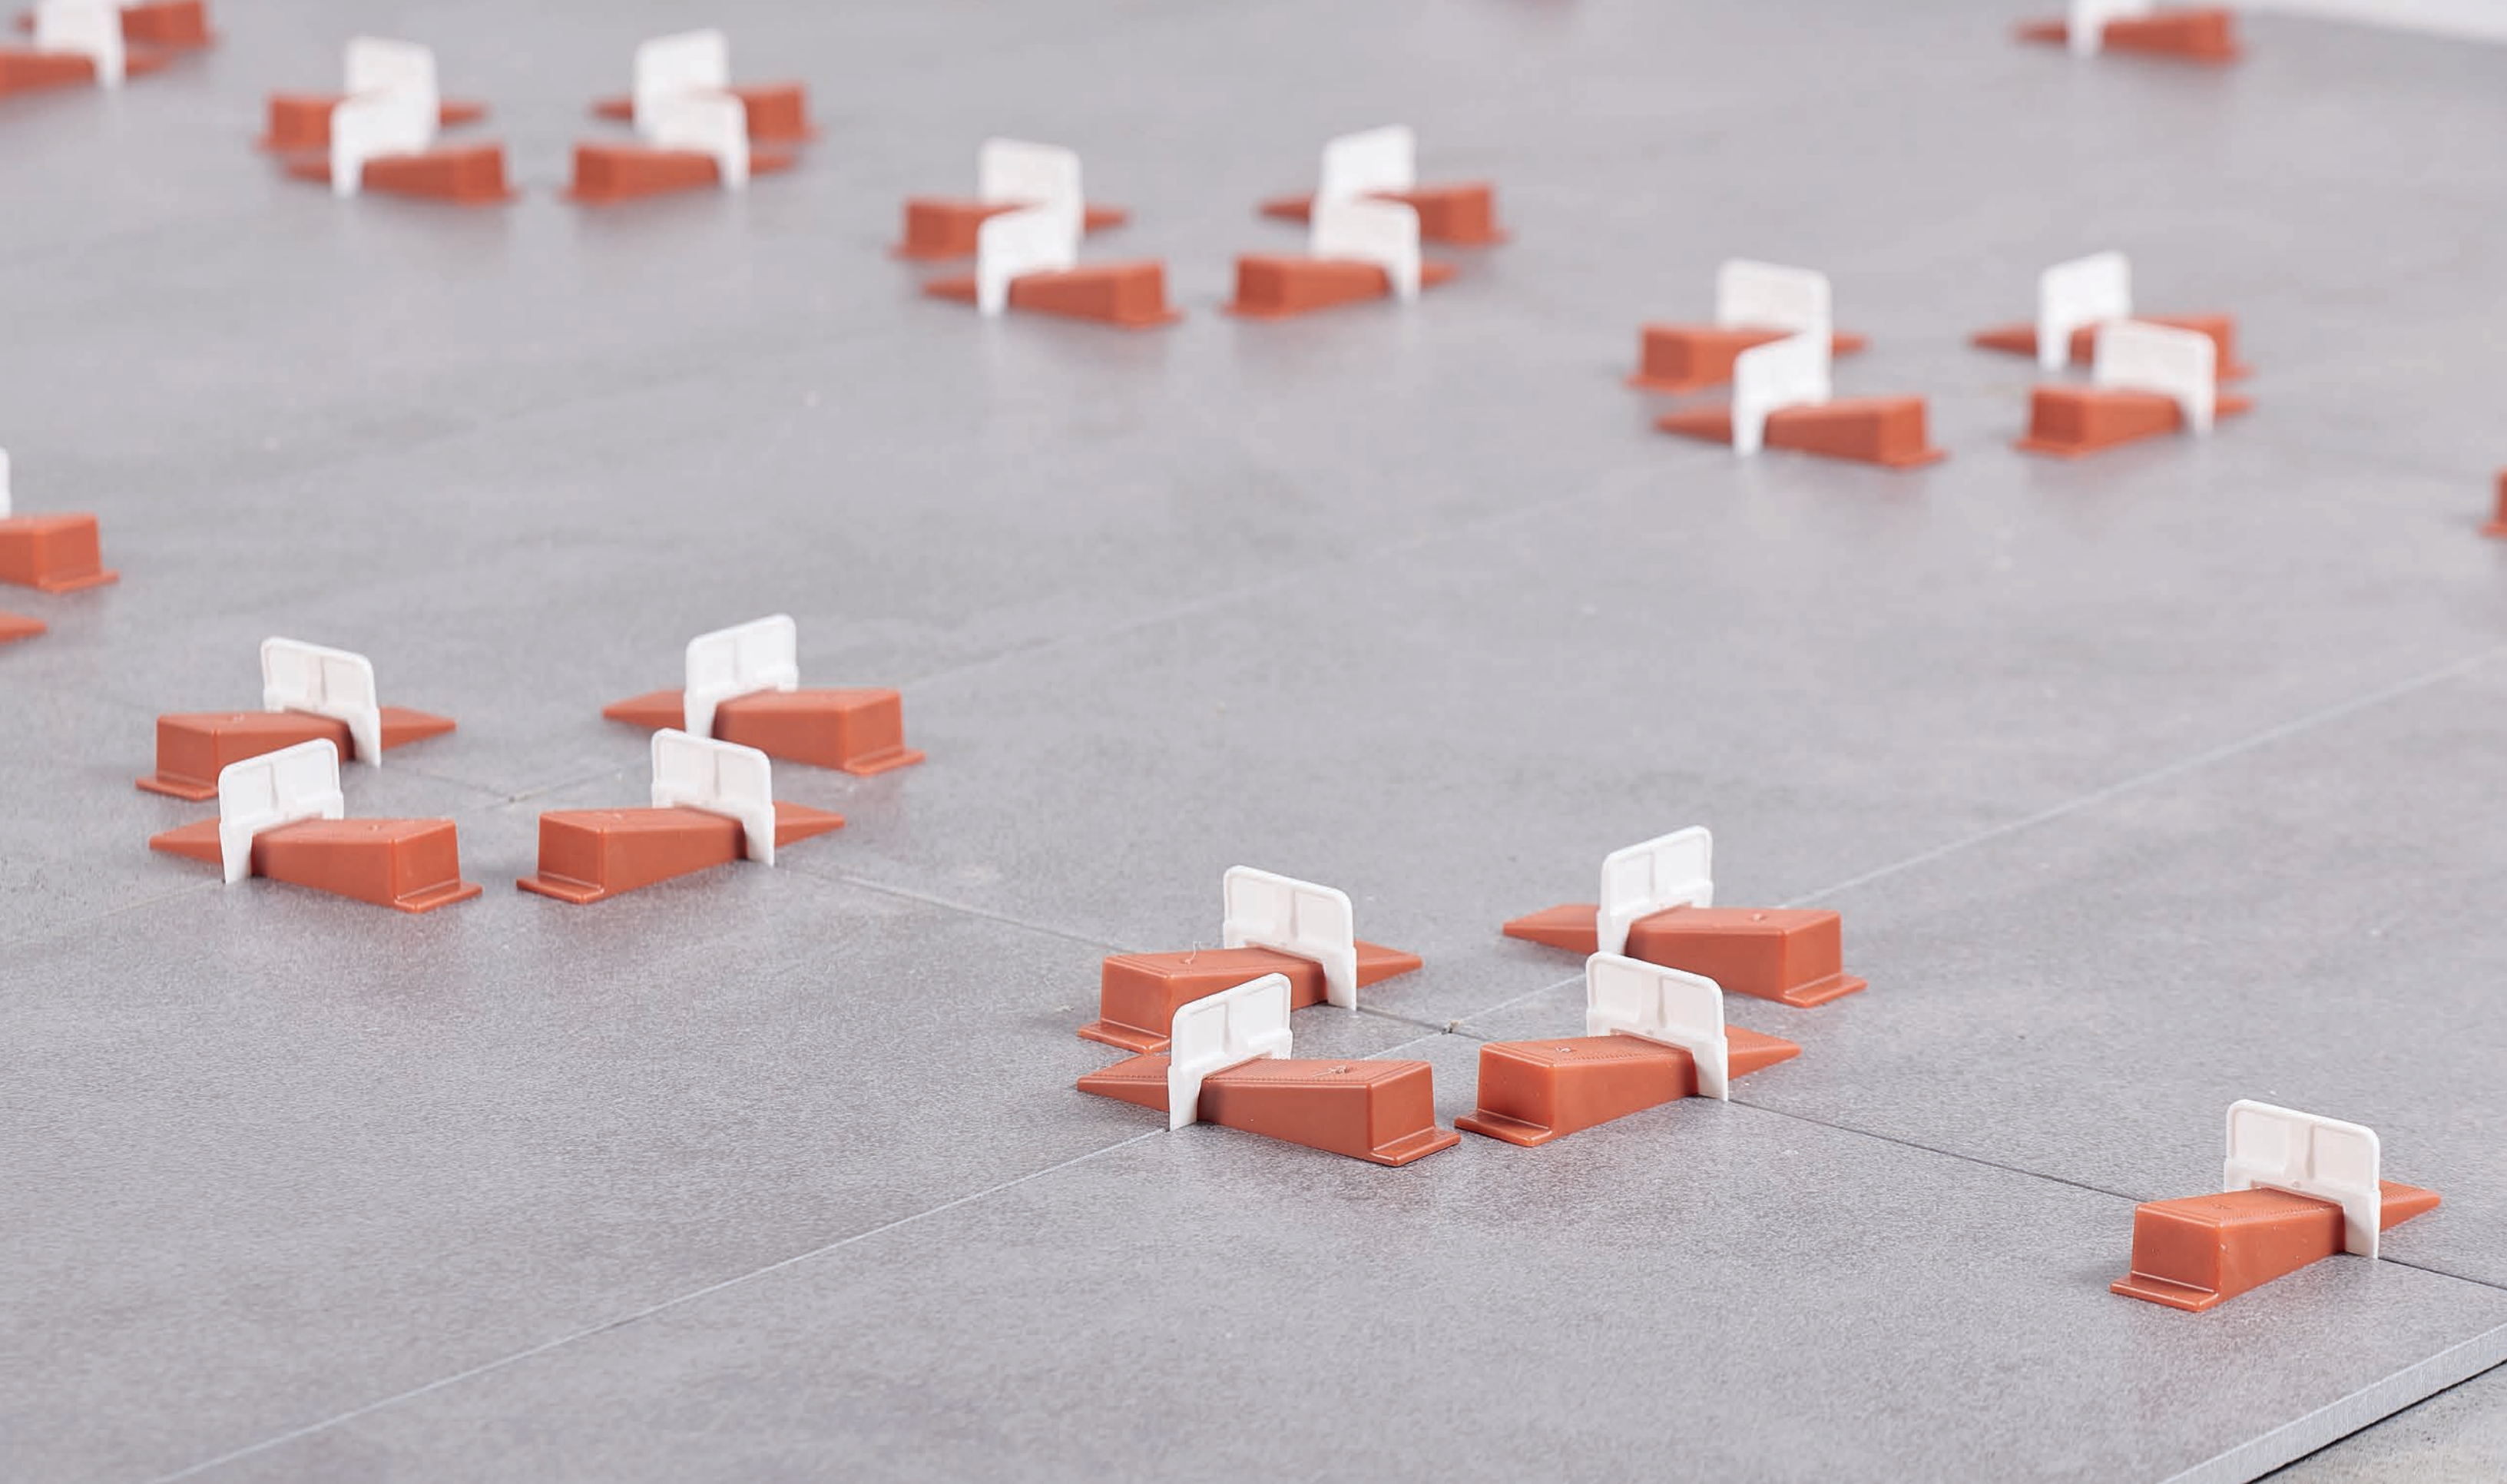

# Pinnacle Plus Wall Base

The architectural lines of Pinnacle Plus wall base reveal Roppe’s keen attention to detail. Formulated with all of the same features and benefits that make Pinnacle rubber base the professional’s choice, Pinnacle Plus base gives the industry unique profiles and exciting options in design.

Installation Products

# Raimondi Leveling System

Raimondi Leveling System is a revolution in the tile setting. In addition to ensuring the proper leveling of tiles by eliminating "lippage", this system helps to speed up the tile setting process. Strongly recommended when installing flexible, large format, heavy or low-thickness tiles. Raimondis Leveling System is made up of three elements: clips (spacers), wedges and pliers. It's the easiest and quickest to remove leveling system: it is enough to kick the spacers to remove the unnecessary part from the installed floor. No tool required.

# Schluter ALL-SET®

Schluter ALL-SET® is a specialized, modified thin-set mortar for use as a bond coat within tile assemblies that is optimized for use with Schluter® membranes and boards. Schluter ALL-SET® is smooth and creamy, as well as easy to handle and spread. It is sag-resistant and ideal for setting tile on both horizontal and vertical surfaces. Schluter ALL-SET® is suitable for use with ceramic, porcelain, and stone tile, including large and heavy tile, in conjunction with Schluter®-Systems' uncoupling and waterproofing membranes (e.g., DITRA, DITRA-HEAT, KERDI, etc.), the Schluter®-Shower System, and KERDI-BOARD. Schluter ALL-SET® can be used in both interior and exterior systems and systems and is available in both grey and white.

# Schluter PRIMER-U

Schluter®-PRIMER-U is a ready-to-use, one-component, solvent-free, 100% acrylic, water-based primer. It is used to ensure excellent adhesion when applying Schluter thin-set mortars to difficult-to-bond-to surfaces such as gypsum underlayment, raised access panels, and existing tile. PRIMER-U is suitable for use with Schluter SET®, Schluter ALL-SET®, and Schluter FAST-SET® in interior applications where increased adhesion is required over various porous and non-porous substrates.

PRIMER-U is a translucent orange liquid that dries to a slightly glossy film approximately 15-60 minutes after application. PRIMER-U provides a strong bond to gypsum underlayment, concrete, existing tile, glass, plywood and OSB subfloor panels, terrazzo, steel, VCT flooring, well-bonded flooring adhesive residue, and latex paint.

# Schluter TREP-SE-S-B

Schluter®-TREP-SE, TREP-S and TREP-B are designed to protect tiled stair edges and provide an easily visible, slip-resistant wear surface for durable, safe, and visually appealing stair-nosing design.

- Prevents tile edges on stairs from chipping
- Ensures a slip-resistant wear surface
- Features a trapezoid-perforated anchoring leg made of stainless steel (-SE) or aluminum (-S and -B) with a slip-resistant, thermoplastic rubber wear surface
- Ideal for offices, shopping malls, and other public areas
- Designed with a colored tread surface, which can be replaced in case of damage or wear (various colors available)
- Designed for areas exposed to heavy foot traffic
- End caps available
- Available in brushed stainless steel (-SE) or aluminum (-S or -B)

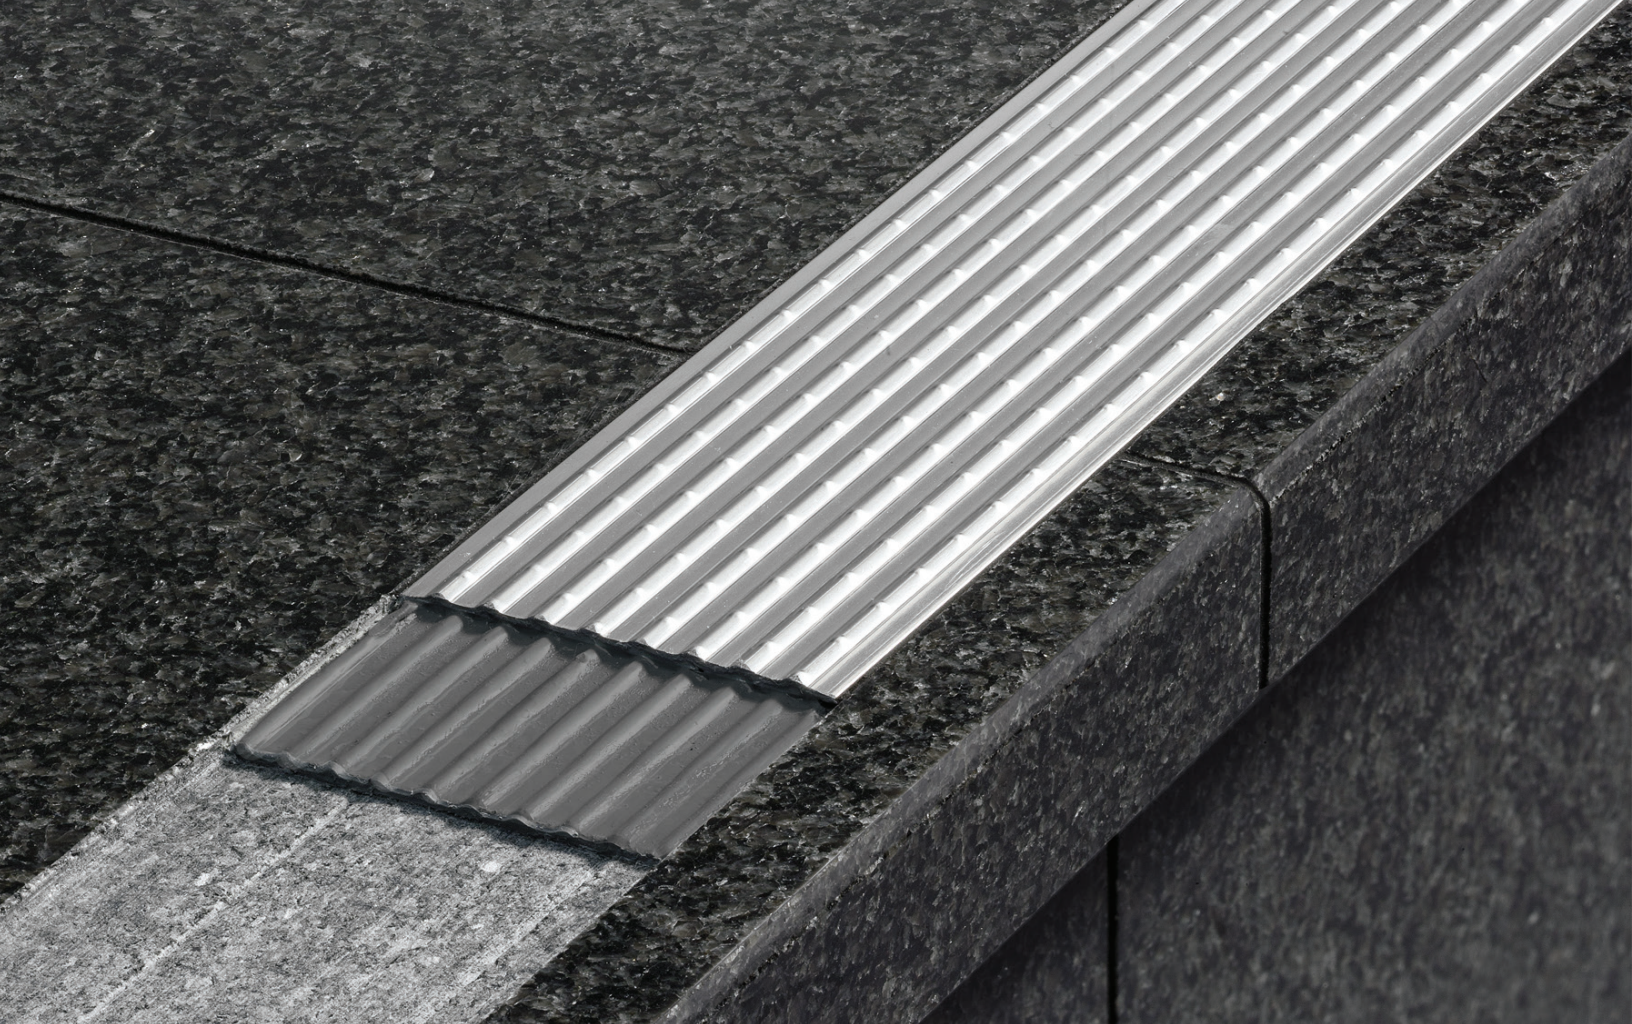

# Schluter TREP-G-GK

Schluter®-TREP-G and TREP-GK are designed to protect tiled stair edges and provide an easily visible, slip-resistant wear surface for a durable, safe and visually appealing stair-nosing design. TREP-GK is subsequently bonded to existing applications (i.e. as a repair).

- Prevents tile edges on stairs from chipping
- Ensures a slip-resistant wear surface
- Features a self-adhesive slip-resistant tread with colored embedded mineral grain coating (various colors available)
- Slip-resistant tread is replaceable
- Features a stainless steel anchoring leg which is embedded in the tile bond coat
- Ideal for offices, shopping malls, and other public areas
- TREP-GK is installed as a retrofit application
- End caps available
- Available in brushed stainless steel

# Schluter TREP-EFK

Schluter®-TREP-EFK is designed to provide an easily visible, slip-resistant wear surface for durable, safe, and visually appealing stair tread design.

- Ensures a slip-resistant wear surface
- Highly visible tread, and suitable for interior and exterior use
- Ideal for offices, shopping malls, and other public areas
- Easily adhered to stair treads with suitable adhesive
- May be installed within recessed area on stair tread or applied to tread surface
- Available in stainless steel

# Schluter TREP-Tap

The Schluter®-TREP-TAP is an anodized aluminum cover profile that integrates with the TREP-S and TREP-B stair-nosing profiles to conceal the top of the riser.

- Prevents tile edges on stairs from chipping
- Increases safety by improving the visibility of stair edges
- Ideal for offices, shopping malls, and other public areas
- Available in satin anodized aluminum in two widths 2" and 2 13/32"
- The cover profile in 2 13/32" (61 mm) features a grooved surface, while the 2" (50 mm) profile has a smooth surface

# Schluter Design Base

Schluter®-DESIGNBASE-SL is a finishing profile used as an alternative to baseboards. It features a clean, finished look and is simply attached to the wall area with a suitable adhesive. The profile can be equipped with an optional sealing lip to protect the floor-to-wall transition from moisture and to reduce the transmission of impact sound. The profile is available in anodized aluminum, color-coated aluminum, and brushed stainless steel.

- May be installed with tile coverings or other floor coverings
- Quick and easy installation with suitable adhesive
- 90° inside and outside corners, connectors, end caps, and sealing lip available
- Brushed stainless steel options available for commercial cove base applications where sanitation is a concern
- Available in brushed stainless steel, anodized aluminum, and color-coated aluminum

# Schluter JOLLY

Schluter®-JOLLY is a finishing and edge-protection profile for the outside corners of tiled surfaces on walls. The vertical wall section of the profile provides a decorative finish and protects adjacent tiles. Other applications include transitions for dado coverings such as carpet, natural stone, or cold-cured resin coatings.

- New! Now available in 10' (3.05 m) lengths
- Prevents tile edges from chipping
- Ideal for creating decorative transitions on walls
- Ideal trim for the top edge of a tiled wall, backsplash, and bathtub surround
- Features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile
- Anchoring leg is available with a radius perforation so that the profile can be used to form curves

# Schluter Quadece

Schluter®-QUADEC is a finishing and edge protection profile for tiled edges and outside corners of tiled surfaces, and is distinguished by its squared reveal surface.

- New! Now available in 10' (3.05 m) lengths
- Prevents tile edges from chipping
- Can be incorporated as an accent within tile fields on floors and walls
- Create modern decorative designs, interesting contrasts, and match with tile and grout
- Combine with QUADEC-FS and/or DESIGNLINE for increased design options
- QUADEC in stainless steel can be used as a stair nosing or floor transition profile
- Now available in 9/32" (7 mm) height in stainless steel and brushed stainless steel
- Available in stainless steel, anodized aluminum, PVC, textured and color-coated aluminum
- Also available in square check and leather texture finishes

# Schluter Rondec

Schluter®-RONDEC is a finishing and edge protection profile for the outside corners of tiled surfaces. It features a trapezoid-perforated anchoring leg that is secured in the mortar bond coat beneath the tile and a reveal that forms a symmetrically rounded outer corner with 1/4" (6 mm) radius along the surface edge.

- New! Now available in 10' (3.05 m) lengths
- Prevents tile edges from chipping
- Ideal for color coordination for tile and grout
- Creates beautiful accents and decorative designs
- Combine with the DESIGNLINE border profile for increased design options
- Features an integrated joint spacer that creates a defined joint cavity between the tile and profile (specific materials only)
- Full line of accessories available, including inside and outside corners, sink corners, connectors, and end caps
- Available in chrome-plated solid brass, anodized aluminum, textured and color-coated aluminum, stainless steel, and PVC

# Schluter Finec

Schluter®-FINEC is a finishing and edge-protection profile for the external edges of tile coverings or mosaics. The finishing leg of the profile protects the covering edges from mechanical damage, and features a very slim, elegant reveal. Available in anodized aluminium in all TRENDLINE colors as well as stainless steel; FINEC is ideal for protecting mitered edges, while creating a discreet trim for a minimalist design.

- Prevents tile edges from chipping
- Ideal for creating decorative transitions on walls
- Ideal for use with mosaic tile
- Features a slim and elegant reveal
- Available in stainless steel, as well as various finishes of anodized aluminum

# Schluter SCHIENE

Schluter®-SCHIENE provides effective and attractive edge protection for tile coverings that are typically bordered by carpet, at expansion joints, or as decorative edging for stairs. The profile offers a discreet, minimum reveal which is ideal for creating elegant transitions between floor coverings. The profile features a trapezoid perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and an 87° sloped vertical wall section that transfers point loads to the substrate and surface covering while protecting tile edges from damage.

- New! Now available in 10' (3.05 m) lengths
- Prevents tiles from chipping
- Ideal for creating transitions on floors
- Ideal for floor installations, where tile is bordered by carpet or wood
- Features an approximately 1/8" (3 mm)-wide visible surface for discreet transitions
- Anchoring leg is available with a special radius perforation so that the profile can be used to form curves
- 87° slope to transfer point loads and protect tile edges
- Available in stainless steel, solid brass, aluminum, and anodized aluminum

# Schluter Reno-U

Schluter®-RENO-U is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete. RENO-U features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface (approximately 25°) that eliminates trip hazards and protects tile edges.

- Prevents tile edges from chipping
- Creates smooth transitions to eliminate trip hazards
- Ideal for transitions from tile coverings to finished concrete
- Certain sizes are ADA-compliant
- Available in stainless steel, solid brass, and anodized aluminum

# Schluter Reno-Ramp

Schluter®-RENO-RAMP is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete, particularly in commercial applications where wheel carts are used. RENO-RAMP features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped transition surface that terminates at the height of the tile edge. The profile protects tile edges and provides a sloped surface to eliminate trip hazards and allow easy access for wheel carts.

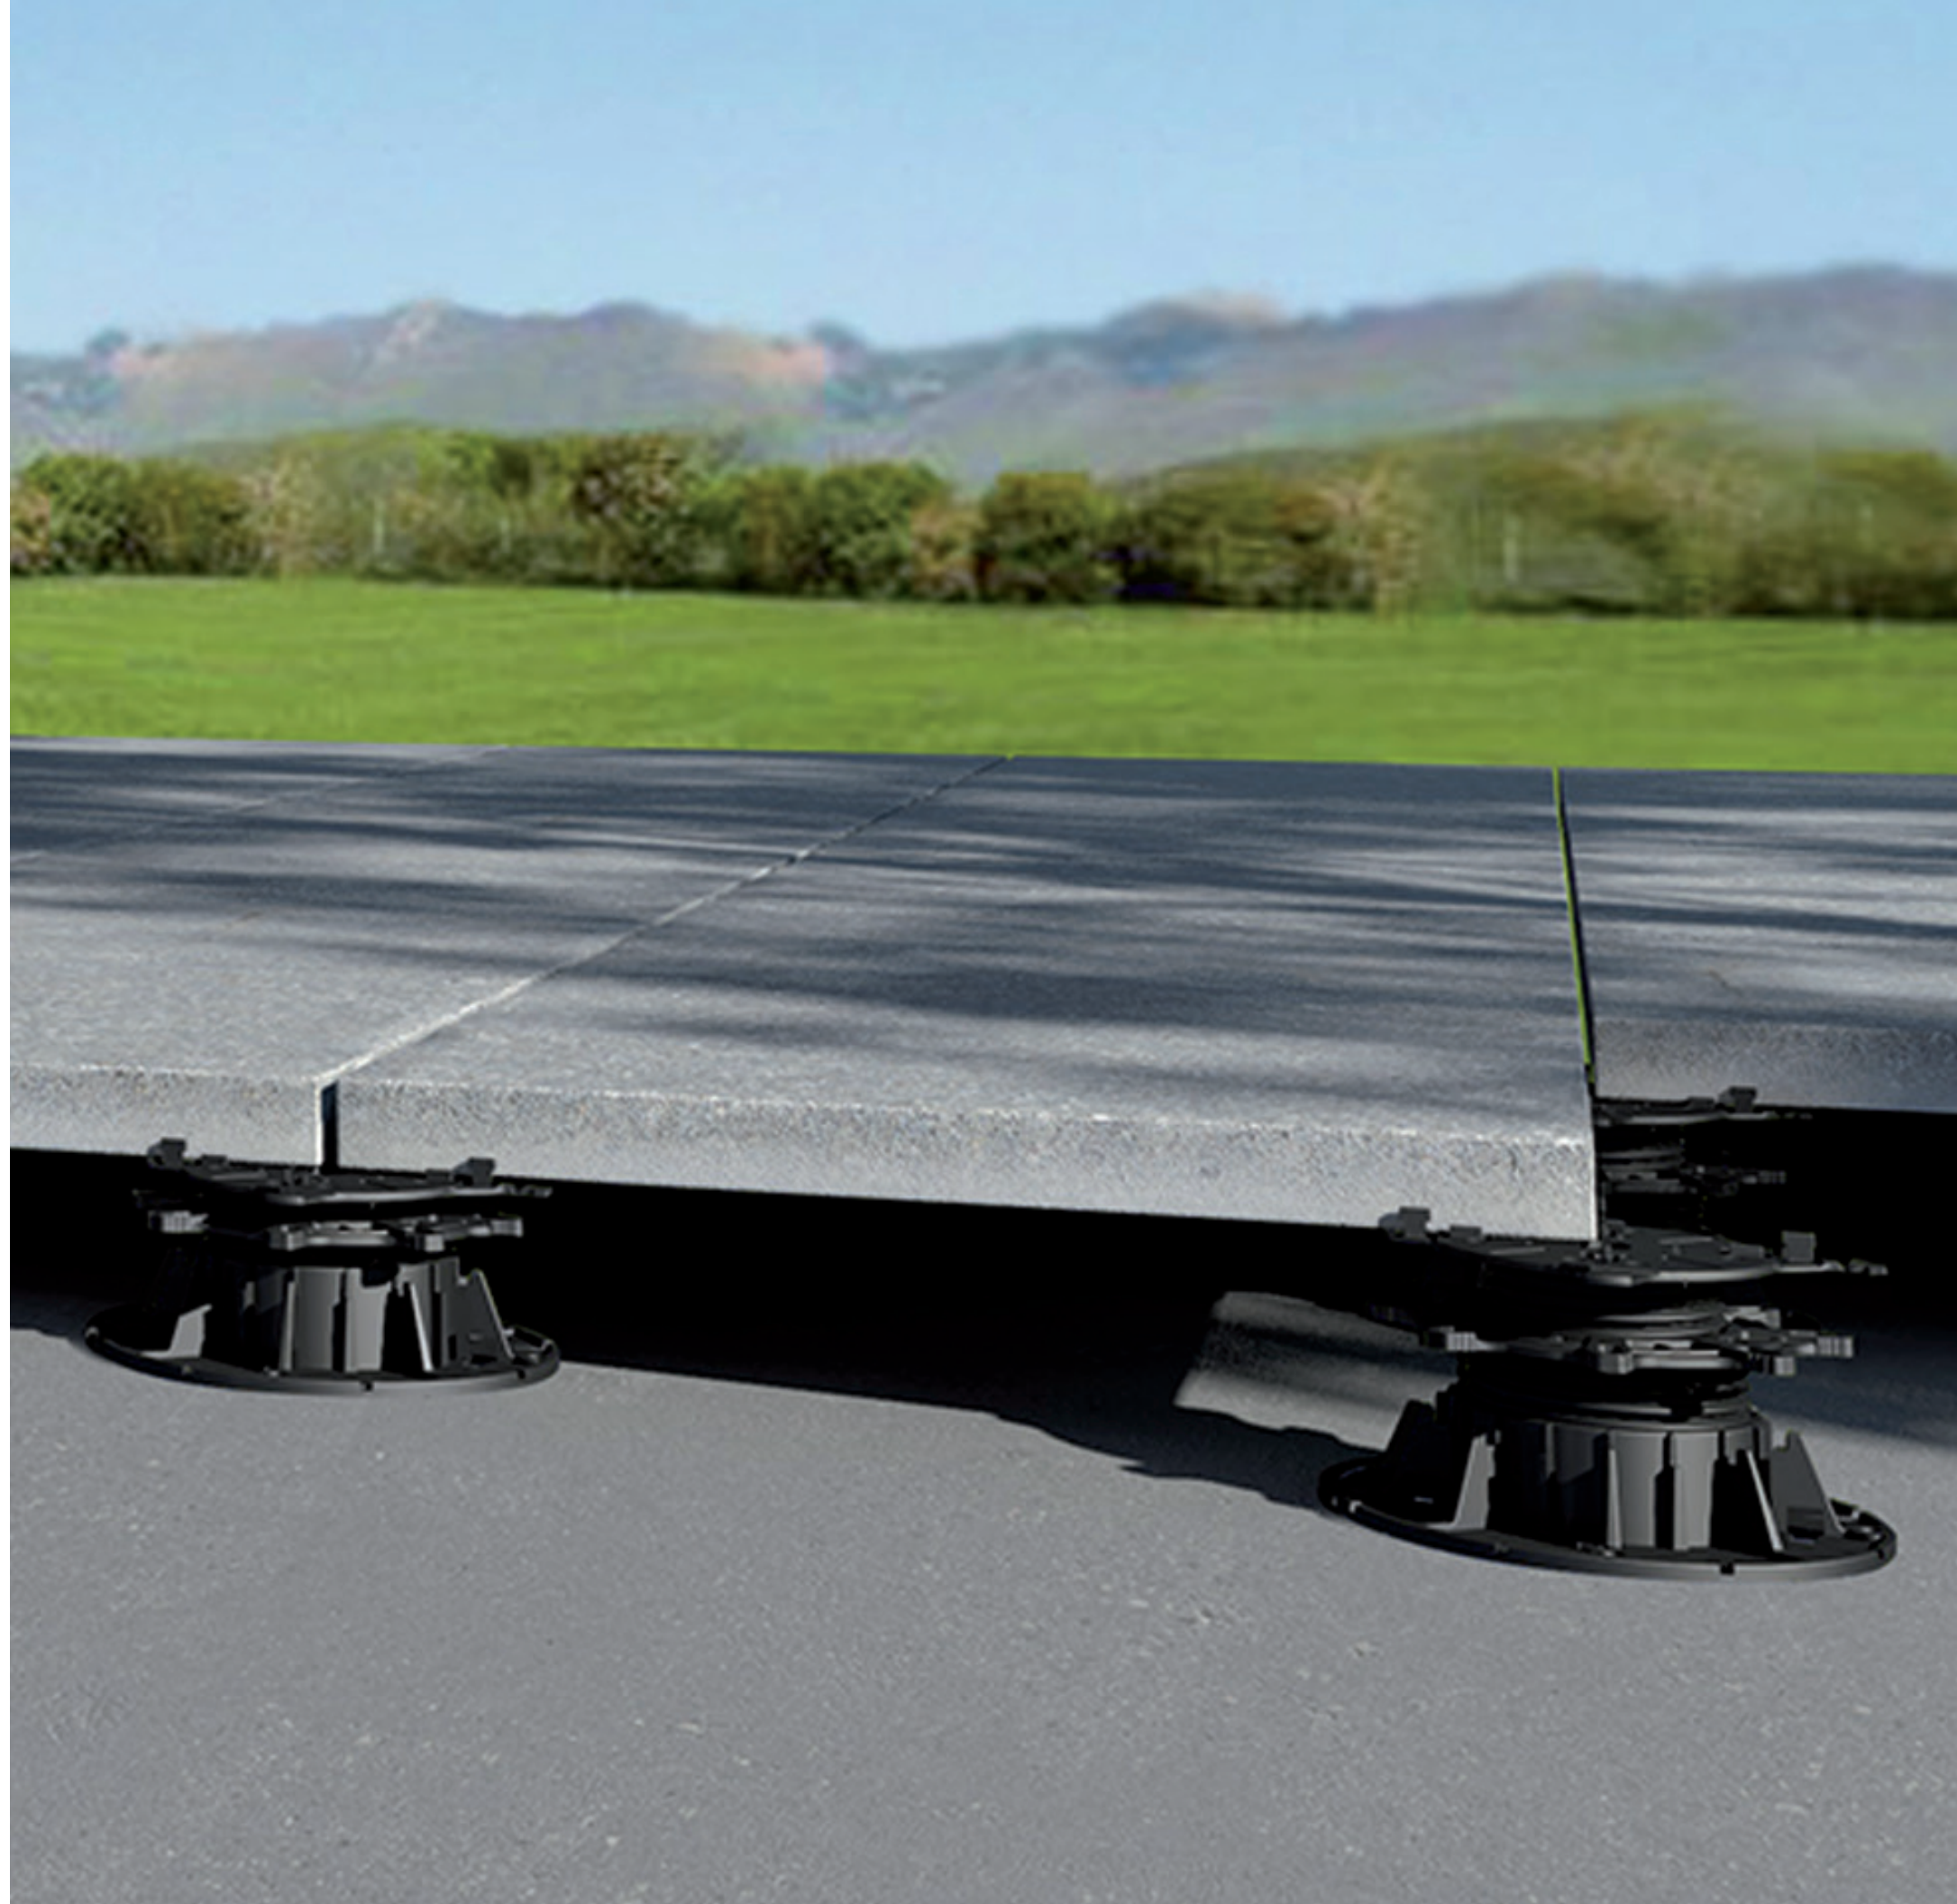

- Prevents tile edges from chipping
- Creates smooth transitions to eliminate trip hazards
- Ideal for transitions from tile coverings to finished concrete
- Suitable for wheel carts in commercial applications
- Certain sizes are ADA-compliant
- RENO-RAMP is installed in conjunction with the tile and features an anchoring leg which is embedded in the tile bond coat
- Switch to RENO-RAMP-K for retrofit applications
- Available in satin anodized aluminum

# Schluter TROBA-LEVEL

The Schluter TROBA-LEVEL paver support system enables the installation of self-supporting paver tiles for exterior applications. System components can be combined in various configurations to compensate for sloped substrates up to 5%, precisely level corners of adjacent paver tiles, and allow flush installation of pavers with different thicknesses. The elevated assembly provides easy access to the substrate, as well as drainage and ventilation. Due to the open joints between the tiles and pavers, surface water can freely drain on to the substrate and, if fitted, into the drainage system beneath. The supports can be variably adjusted from 2-3/8" to 5-1/8" (60 - 130 mm) using the height adjustment ring and two opposing threads. To achieve greater heights, TROBA-LEVEL-PLA 70 height extensions can be added between the height adjustment ring and the base plate.

Schluter-TROBA-LEVEL pedestal system products are manufactured using polyethylene (PE) or polypropylene (PP) materials. They are serviceable in temperatures from -40°F to 131°F (-40°C to 55°C). Schluter-TROBA-LEVEL-PLS 6 protective pad is manufactured using granulated rubber with an aluminum lining laminated on one side. All products are UV-resistant, do not rot, recyclable, physiologically harmless and compatible with bitumen.

- Preassembled and easy to adjust height between 2-3/8" to 5-1/8" (60 - 130 mm)
- Multiple TROBA-LEVEL-PLA 70 adjustable paver support extensions can be stacked to reach a maximum height of 15" (381 mm)
- Features an integrated joint spacer that creates a uniform joint between pavers and protects against lateral movements at the perimeter
- Stackable in combination with TROBA-LEVEL-PL 10 and -PLA 30
- TROBA-LEVEL-AP 1 leveling shims and TROBA-LEVEL-PLS 6 protective pad are also available

**ANY TILE.  
ANYWHERE.  
ANY TIME.**

**ULTIMATE 6 PLUS PROVIDES THE  
ULTIMATE IN VERSATILITY.**

Longer open  
time for more  
efficient install

Apply grout just  
6 hours after  
laying tile

Offers very  
easy trowel  
application

Great non-sag  
and non-slump  
characteristics

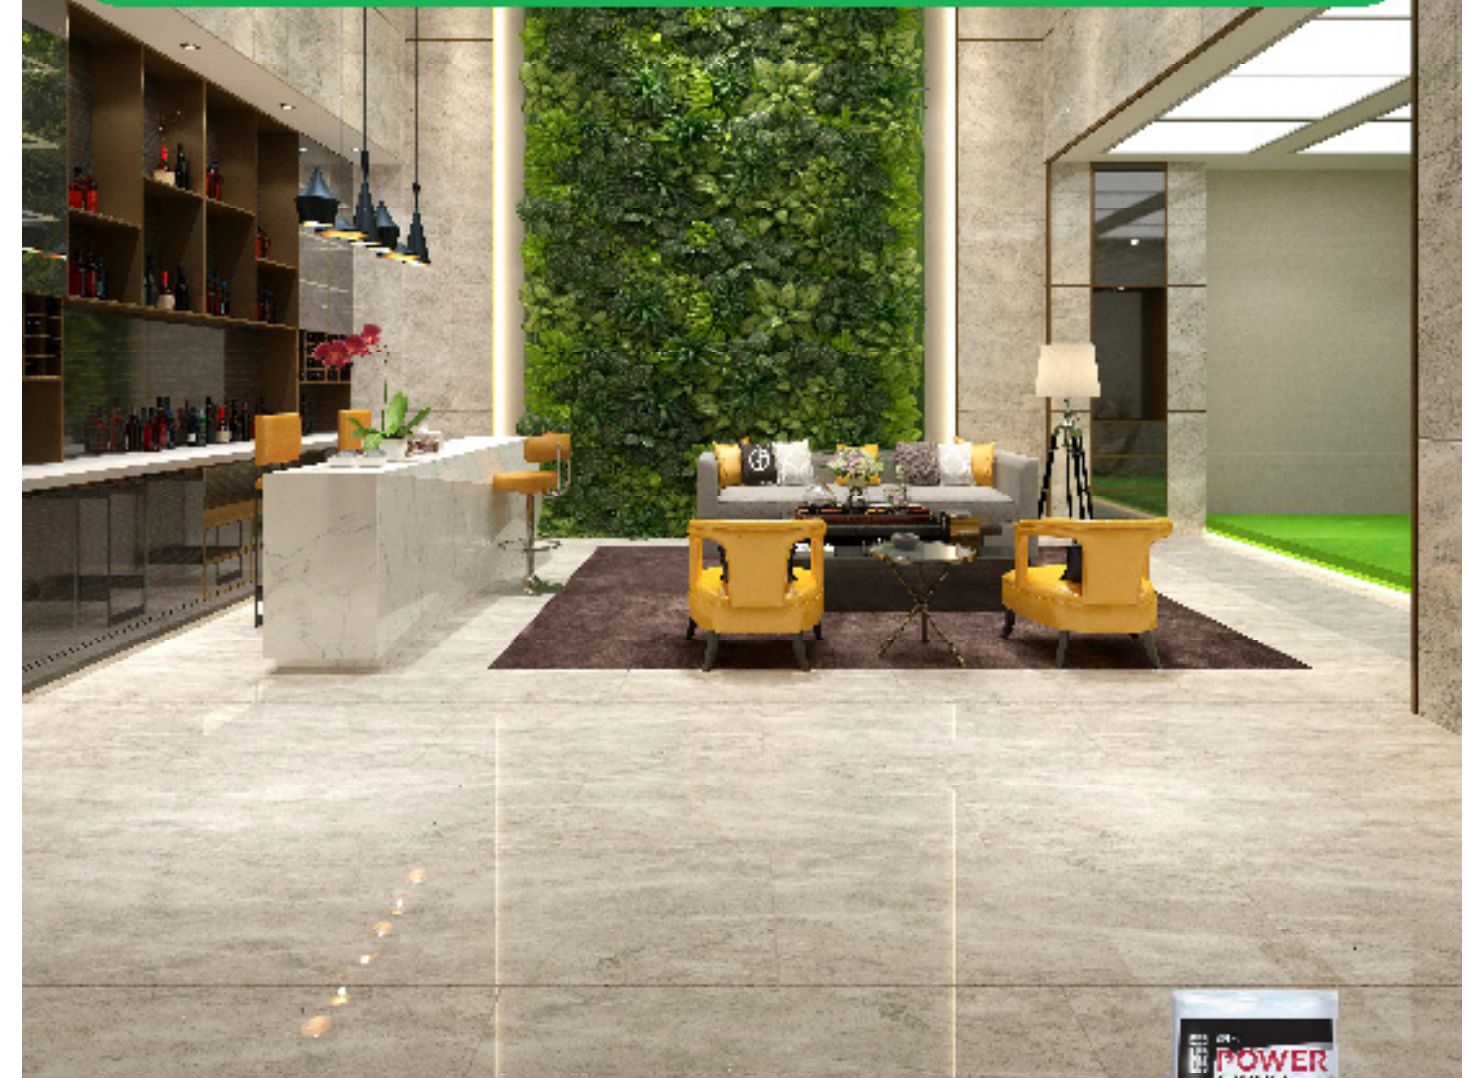

Ultimate 6 Plus is a high-performance, polymer-modified mortar that provides superior handling and full coverage with minimum effort. This versatile, one and done mortar can be used for 98% of your jobs – from installing the smallest to the largest tiles. No stress. No sag. No slump. No back buttering. No bull.

**Best All-Around Performance**

**TEC® Power Grout®**  
**Advanced Performance Grout**

TEC® Power Grout® is an advanced performance grout that offers extended pot life with a fast set time, superior stain protection, and guaranteed zero efflorescence. It also provides strong, color consistent joints free of efflorescence, that are resistant to shrinking and cracking. Power Grout provides excellent performance in environments such as high traffic and wet conditions, and in residential and commercial applications. It never needs sealing and sets in four hours.
